PROFILE

Detail-oriented Full Stack Web Developer with hands-on experience in building scalable web apps using React, Node.js, and MongoDB. Skilled in problem-solving and team collaboration, with a strong foundation in data structures and algorithms.

EDUCATION

Software Development, *Masai School*   09/2024 – 08/2025 | Bengaluru, Karnataka

Bachelor of Technology in Computer Science,   08/2020 – 06/2024 | Ranchi, Jharkhand
Cambridge Institute of Technology

SKILLS

Technical Skills   **Soft Skills**
HTML, CSS, JavaScript, React, Node.js, Express.js,   Communication, Problem-solving, Adaptability.
MongoDB, Git, GitHub.

PROJECTS

Financial Time Machine, *Financial Time Machine*   05/2025 – 05/2025
- Built a personal finance tool with "What-If" simulations for career changes, investments, and major purchases.
- Integrated AI-driven insights, behavior tracking, and a privacy-first approach with no third-party data sharing.
- Enabled dynamic visualizations for budget forecasts and scenario comparisons using charts and interactive components.
- Implemented local storage caching and offline support for continuous access to user simulations without internet.
- Added form validation and error handling to ensure accurate user inputs and improve user trust.
  Tech Stack: React, Chakra UI; solo project completed in 2 days.
  GitHub • Live Demo

Revamped Niche Community Platform, *Niche Community*   04/2025 – 04/2025
- Developed a discussion platform with threaded conversations, real-time updates, voting, polls, and personalized feeds.
- Integrated Firebase Auth for secure authentication and RESTful APIs for seamless data handling.
- Implemented role-based access control to manage permissions for moderators, users, and admins.
- Optimized client-side rendering and database queries for faster load times and smoother interactions.
- Added notification system to alert users of new replies, votes, and poll results in real-time.
  Tech Stack: React, Firebase, REST API, Chakra UI; 2-member team project completed in 6 days.
  GitHub • Live Demo

Movie Booking System, *Showtime*   12/2024 – 01//2025
- Implemented secure user authentication with login and signup functionality.
- Integrated event listings with timings, venues, ticket prices, and real-time seat booking.
- Enabled filtering and sorting of events based on date, category, and location for a better user experience.
- Developed responsive UI for cross-device compatibility, ensuring smooth usability on mobile and desktop.
- Integrated localStorage for saving user preferences and recent activity for improved personalization.
  Tech Stack: HTML5, CSS3, JavaScript; 4-member team project completed in 6 days.
  GitHub • Live Demo
